COST AND PRICE ANALYSIS - RESEARCH AND DEVELOPMENT CONTRACTS

(This form is to be used in lieu of DD Form 633, as provided under ASPR 16-206. It will be executed and submitted with proposals in response to "Requests for Proposals," for the procurement of research and development services. If your cost accounting system does not permit analysis of costs as required, contact the purchasing office for further instructions.)

TECHNICAL DESCRIPTION

15° EYEPIECE TUBES

for

25X1 [redacted] STERESCOPES

These eyepiece tubes replace the standard tubes on the [redacted] 25X1
StereoZoom Microscope, Zoom 70 Stereoscope and Zoom 95 Stereoscope. They cannot be used on instruments which have image rotation eyepiece tubes. They deviate the optical path by 45°, thereby changing the eyepiece angle from 60° from the horizontal to about 15° from the horizontal. (See drawing [redacted]6-1016-1). 25X1

The eyepieces must be shortened to fit into these tubes. The conversion of the instruments consists of the following steps: Removal of the eyepiece tubes by unscrewing, removal of the dust cover glass and replacement with a glass cylinder, screwing on the new eyepiece tube and orienting. If necessary, the eyepiece tubes may be centered to the optical axes by using the centering screws on the pod.

(This last step is normally a factory operation, but instructions will be furnished to customers converting their own instruments).
